(54) Title: SELECTIVE ENHANCEMENT OF DIGITAL IMAGES

(57) Abstract: A method for image processing of a digital image is described comprising applying an image processing filter (17) as a function of the correspondence between each pixel in the image and a first target image characteristic (12) and a second target image characteristic (13). In a further embodiment, a method is described comprising applying an image processing filter as a function of the correspondence between each pixel, the received target image characteristic, and the input received from a user pointing device. A system and application user interface is also described.
